VAPOR4LIFE®

SMILEOMIZER USER MANUAL

FILL IT UP

It's imperative to fill your Smileomizer properly the first time, so you'll get the perfect puff each and every time. Your patience will pay off big! As you fill, make sure to drip the e-juice slowly, so it can absorb all the way for a perfect hit. The first fill will be a little messy, but if you follow these instructions, your fills will last longer and taste better. You'll get the most natural smoking satisfaction you've ever had.

- Unscrew the mouthpiece from the Smileomizer. Place the smileomizer on a flat surface that is covered in a napkin or tissue to absorb any e-juice.
- A small Smileomizer will hold approximately 90 drop (3-3.5ml) when being filled the first time. A large Smileomizer will hold approximately 120 drops (6-6.5ml)
- Carefully drip e-juice directly onto the cotton polyfill. Do not drip e-juice into the center tube. That is the air intake.

- After filling your Smileomizer to capacity, let it sit for at least 15 minutes. It is worth the wait because the newest generation Smileomizer has a higher performance coil.
- Replace the tip, hold your mouth to the top of the Smileomizer and gently blow any excess liquid into a tissue. There wont be much if you filled it to the correct level.
- Wipe any excess liquid from the bottom of the Smileomizer before reconnecting it with the battery. Once all the pieces are in place and the e-juice is fully absorbed, you will enjoy the finest vapor puffs you have ever had.

This may seem like a lot of steps, but it is worth investing a few extra seconds to guarantee the flavor and vapor in every puff.

VAPE IT

Make sure the connectors on your Smileomizer and battery are clean and free of fluid before attaching them. Then, just vape-on!

REFILL IT

When your flavor starts to weaken, it's time to add more e-juice. Simply unscrew the Smileomizer from the battery, unscrew the top, and top it off. If you fill it right the first time, you can refill most Smileomizers five times or more before you need a new one.

WHY ITS SO IMPORTANT

I cannot stress enough how much of a difference it made for me when I started to fill my Smileomizers the right way. I worked here for seven months before finally I sat down with Smilin' and actually took the time to learn how to fill a Smileomizer right. Before I learned to take my time, they wouldn't last as long as I wanted because I was filling them too quickly and wasting e-juice.

WARNING

Only use the Vapor Zeus and Smileomizer with Vapor4Life equipment. If you use it with other equipment, and something malfunctions, your warranty will be voided.

- DO NOT drip liquid in center tube of cart
- DO NOT fill cart when connected to battery
- ENSURE clean surfaces on both the end of the cartomizer and battery before connecting
